The Honorable Ralph Regula
Chairman
House Appropriations Subcommittee on Labor, Health & Human
Services, Education and Related Agencies
2306 Rayburn House Office Bldg.
Washington, D.C. 20515-3516

RE: Qualified State High Risk Pool Grant Programs

Dear Chairman Regula :

The undersigned organizations respectfully request full funding for the qualified state high risk pool grant programs. These grant programs were originally established through the Trade Adjustment and Assistance Act (TAA) of 2002. They were recently enhanced and extended through the State High Risk Pool Funding Extension Act (H.R. 4519) that President Bush signed into law on February 10, 2006. **Public Law 109-172 authorized to be appropriated \$75,000,000 for each fiscal year from 2007 through 2010.**

High risk pools have been in existence for over 25 years and have helped to stabilize the cost of health insurance in the individual market in the 33 states that have adopted them. They play a critical role in providing health insurance coverage to those who are sick and uninsured, as well as individuals leaving group coverage with serious medical conditions. The federal seed grants programs have helped states financially to get a pool up and running. The operational grant program has helped states with qualified high risk pools offset a portion of the costs of the pools and reduce premiums charged to participants in some states. These programs provide an important safety net for those who are sick.

We urge you to include full funding for the state high risk pool grant programs as you begin drafting the FY07 Labor, Health and Human Services Education, and Related Agencies Appropriations legislation. Full funding for these programs will ensure that states are getting the help they need for the sickest Americans.

Sincerely,

Alabama Health Insurance Plan
Wynnette Smith, Program Director
